

Q1. Which skin type is most suited or highly recommended to use Olive Manon Virgin Oil?

Olive Manon Virgin Oil has a wide range and variety of usages and thus there is no need to select the individual quality and type of skin in which it is most suited for.

Q2. I have very oily skin. Can I still use Olive Manon Virgin Oil? Will my skin become more oily?

Oily skin requires an oil-based cleanser to thoroughly cleanse and take away excess oil and dirt from the skin. When used on oily skin, the oil-based cleanser will dissolve the oil and dirt together, allowing them to surface onto the skin, so that the dirt and oil will be well-cleansed off. Olive Manon Virgin Oil thus makes an excellent cleanser for oily skin.

Q3. Will my skin change colour after using Olive Manon Virgin Oil?

Skin care products that contain mineral oil or not pure olive oil will cause the skin colour to change if it comes into contact with UV rays. This is due to chemical reaction. Olive Manon Virgin Oil is derived from natural products, i.e. the olive fruit only and does not contain any chemicals or additives. As such, its natural qualities allow Olive Manon Virgin Oil to be used as a UV protector.
